Your Thinking

1. What are our **current** practices?

2. What are the **beliefs** that support current practices?

3. What are **evidences** that current practices are working/not working?

4. What are the **"suggested"** practices?

5. What are the **beliefs** that support "suggested" practices?

6. What is the best we can hope for if we **don't** explore the "suggested" practices?

7. What is the best we can hope for if we **do** explore the "suggested" practices?

8. Is it **worth** it?

9. What are the **conditions** that would increase the probability of best results?
